SKILLS

Java | Selenium | TestNG Framework | Maven | Eclipse IDE | Automation Testing |Manual Testing | Functional Testing| JIRA | POM | Accessibility Testing | Smoke Testing| Sanity Testing | RTM | Regression Testing | Selector Hub | HP ALM | IntelliJ | Gharking

EDUCATION

Bachelor of Engineering- E&TC,

Sinhgad Academy of Engineering, Pune University   May 2019

PROFESSIONAL EXPERIENCE

Senior Software Engineer, Team Lease Digital

Jan 2024 to Feb 2025 Hyderabad, India

Project Description: As part of the SRP SIT team for Bank of America, I performed end-to-end testing on complex projects such as TrustWeb, Client Verification, PACE, MLT, Quick View, Search Request, and Search Cash Tickler. Using roles like Admin, Cash COE, and Cash COE MLT, I validated workflows, executed test cases, and ensured system reliability, contributing to the seamless delivery of critical banking solutions.

Key Responsibility Area:

- Analyzing the requirements given in the high-level document.
- Understanding the Design document.
- Experience in preparing test scenarios based on the requirement covering the positive, negative, Regression & boundary cases for testing.
- Performed Regression testing on test cases to ensure the system is functioning without any issue for every release.
- Making the changes according to the Design document.
- Preparing Test data and Involved in Peer Reviews.
- Defect Reporting. Interact with developers and discuss technical problems.
- Validate the transactions status flow in SRP and validate End to End flow.
- Performed transaction and monitoring in QA/PL1/PL2 Environment.
- Validate the transaction status flow in SRP and validate End to End flow.
- Involved in production support & SIT support.
- Exploratory testing on various areas of application.

PROFESSIONAL EXPERIENCE

Senior QA Engineer, Bacancy Technology LLP

Nov 2023 to Jan 2024 Ahmedabad, India

Project Description: Traveler's is an insurance domain platform. I worked on the Car Insurance application, focusing on testing billing functionalities like premium calculations, payment processing, and invoice generation, ensuring accuracy and seamless user experience.

Key Responsibility Area:

- Understand the customer requirement by analysing SRS documents.
- Interact with developers and discuss technical problems, Bugs Tracking and Generating Reports.
- Performed elaborate functional testing along with exploratory testing of the entire site. Also worked on test case maintenance when necessary.

- Reporting the Regular status to the higher authorities in a timely manner.
- Designing and Executing test scripts by referring to the Manual Test cases.
- Experience in UI automation testing.
- Developing POM classes and Test classes.
- Performed Functional Testing, Retesting and Regression Testing.
- Identification of defects, registering them in JIRA and reporting them to the onsite lead.

PROFESSIONAL EXPERIENCE

Software Test Engineer, Bebo Technologies

Aug 2021 to July 2023 Chandigarh, India

Project Description: Box is a cloud-based content management system enabling users to store, share, and collaborate on files. I worked on end-to-end testing of the application, focusing on billing functionalities such as subscription plans, payment workflows, and invoice generation. My role involved functional and regression testing, automation of key test cases, and collaboration with developers to ensure accuracy and reliability of billing processes, contributing to a seamless user experience.

Key Responsibility Area:

- Understand the customer requirement by analysing SRS documents.
- Interact with developers and discuss technical problems, Bugs Tracking and Generating Reports.
- Performed elaborate functional testing along with exploratory testing of the entire site. Also worked on test case maintenance when necessary.
- Reporting the Regular status to the higher authorities in a timely manner.
- Designing and Executing test scripts by referring to the Manual Test cases.
- Experience in UI automation testing.
- Developing POM classes and Test classes.
- Performed Functional Testing, Retesting and Regression Testing.
- Identification of defects, registering them in JIRA and reporting them to the onsite lead.
- Performed Globalization and localization testing on sites with various locales like Japan, Deutsch, English, etc.
- Exploratory testing on various areas of application.

PROFESSIONAL EXPERIENCE

QA Intern, Brillioz infotech Pvt Ltd

Feb 2021 to July 2021 Pune, India

Key Responsibility Area:

- Exploratory testing on various areas of application.
- Learn about the application features and understand what needs to be tested.
- Perform manual testing by following test cases and checking if the software works as expected.
- Verify if the fixed issues are resolved and ensure new changes do not break existing features.
- Find software issues (bugs) and document them clearly in a bug-tracking tool.
- Check if reported bugs have been fixed correctly.

- Understand basic testing concepts like functional testing and regression testing
